

## Entrepreneurship and Innovation Major

(Requirements for class of 2022)

---

The Entrepreneurship and Innovation major provides MBA students with skills, analytical tools, perspectives, and experiences that prepare them for careers as autonomous entrepreneurs, family-business entrepreneurs, or entrepreneurs in corporate settings. Whether a student wants to start a business while in school, join an emerging business, or set the groundwork to launch a new firm later in his or her career, the program aims to provide preparation for all of these exciting options. Entrepreneurial skills and thinking are actively sought by more competitive and profitable growing businesses. The special strength of this program is that it combines theory with practice, providing students the opportunity to test the theories, models, and strategies learned in the classroom by creating real business plans, working on other field projects, and gaining access and insight from leaders in the entrepreneurial business community.

The Entrepreneurship and Innovation major and related co-curricular activities are supported in part by the Goergen Entrepreneurial Management Program at the Wharton School's Venture Lab.

### REQUIREMENTS FOR THE MAJOR

The Entrepreneurship and Innovation major consists of 4.0 credit units beyond the required Wharton core.
